

SBN WHITE 1300A **(HIGH PIGMENT CONTENTS NANO INK)**

SBN WHITE 1300A is high pigment contents nano Ink.
It is the nano pigment base for industrial paint.

1. Physical Properties

Properties	Result
Appearance	White Liquid
Color Index No	White 6
Viscosity (CPS, 25°C)	1000 Under
Pigment Solid Contents (%)	30 ± 1
Dispersion Particle Size (µm)	0.2 µm Under
Resin	Cellulose Acetate Butyrate
Solvent	MIBK

2. Product Properties

- SBN White 1300A is low viscosity high concentrated pigment dispersion Ink.
- SBN White 1300A is hologen-free type high concentrated pigment nano Ink.
- SBN White 1300A is excellent durability.
- SBN White 1300A is excellent compatibility with various resin.
- SBN White 1300A is excellent transparency.

3. Application

- SBN White 1300A is main application is industrial paint and Ink.
- Coating Method : Micro Gravure Coating and Automatic Spary Coating.

4. Storage conditions

- This product must be kept in shade and cool area.
- This product is stable for 6 month when stored at 20°C with unopened original container.
- This product observe in flame because contain organic solvent.
